Laboratory Products Association Elects New Directors

White Post, VA – The Laboratory Products Association (LPA) is pleased to announce its new directors who were recently elected or re-elected to serve a three-year term on the Board of Directors. The slate was announced by the association's Chair, Kelly Williams, on October 5 during its virtual Annual Meeting.

The following individuals were elected to serve as Directors on the LPA Board of Directors for the 2020-2023 Board term:

- Jim Averso - Vice President, Sales & Marketing, I.W. Tremont
- Ken Falkowitz - VP, Strategic Marketing, DWK Life Sciences
- Bill Halsey - Area Business Manager, MettlerToledo
- Michael Klipstein - Chief Commercial Officer, Thomas Scientific
- Harry Ruska - General Manager, GFS Chemicals

Those currently serving on the LPA Board of Directors are:

- Kelly Williams (Chair) - Senior Director, Channel Management, Laboratory Products, Thermo Fisher Scientific
- Kevin Frake (Vice Chair) - Vice President, Business Development, Integrated Liner Technologies
- Jim Dawson (Immediate Past Chair) - President, Heidolph North America
- Pat Anderson - President, Labconco Corp.
- Amy Debroczy - Director of Global Channels, Corning Life Sciences
- David D'Angelo - Vice President, Global Portfolio Management, Fisher Scientific Channel
- Michael Faulkner - General Manager & CEO, LAUDA Brinkmann, LP
- Liz Kasberg - GM Commercial - Consumables USCAN, Cytiva
- Leo Stevens - SVP, Global Pricing, Analytics & Sales, Cole-Parmer
- Warren Stone - Senior Vice President Research & Applied Solutions, North America, MilliporeSigma
- Ryan Titmas – President & CEO, Elementar Americas, Inc.
- Jonathan Yoppi - Vice President, Portfolio Management, Americas, VWR, part of Avantor
- Amy-Jo Yogmas - Vice President, Sales and Channel Management, Boekel Scientific

###

The Laboratory Products Association (LPA) was founded in 1918 as the Scientific Apparatus Makers Association. Its member companies are manufacturers and distributors of lab products such as glass and plasticware, chemicals, equipment and supplies used in scientific research and applied science and life science worldwide.
